Customizing EdReady Assessments: A Visual Guide

The SCOPE is divided into UNITS (colors), which are divided into TOPICS (boxes), each of which is composed of one or more learning objectives (not shown).

Step 1: Customize scope

Step 2: Save assessment

Step 3: Set initial diagnostic

DEFAULT SCOPE

A complete scope of dev math expectations is pre-loaded into EdReady. The scope is comprised of a series of *learning objectives* (LOs), or *curricular standards*.

CUSTOM SCOPE

Most situations only require students to study a subset of the default scope. You decide which LOs, topics, or units are included or excluded.

CUSTOM ASSESSMENT

When saved, the custom scope defines a custom EdReady assessment. Your students will be responsible for every LO in this assessment.

INITIAL DIAGNOSTIC

Your students will first take an initial diagnostic, which covers only a subset of the custom assessment. Later, the remaining LOs will be assessed as well.
